# Our Indentity - **Our Purpose** - Our Impact

 Transparent Partnership

 Domain Driven Expertise

 Client Centric Approach

 UAE & INDIA Region

 Expert Talent Network

Cybercentrix is a technology and cybersecurity services company delivering secure, scalable, and industry-aligned IT solutions across the **INDIA & DUBAI region**.

We help organizations modernize infrastructure, protect digital assets, and drive operational efficiency through structured technology delivery.

# Who We Are

## Trusted IT & Cybersecurity Partner

We help organizations modernize, secure, and manage their digital ecosystem through advanced cybersecurity, custom software, infrastructure, and AI-enhanced solutions.

**Vision**

To be a trusted technology partner enabling secure digital growth across enterprises and institutions.

**Mission**

To deliver reliable, compliance-aligned, and scalable technology solutions that strengthen security, optimize performance, and support long-term transformation.

# Our Solutions

## Application Modernization

Future-proofing businesses by transforming legacy systems

## Generative AI

Accelerating innovation with cutting-edge AI technologies

## Infrastructure & Security

- Cloud & hybrid infrastructure
- Network design & security
- Monitoring & maintenance
- Business continuity & disaster recovery
- Mobile device management solutions

## Supply Chain

We transform supply chains end to end—integrating strategy, technology, and execution at every step.

## Data & Analytics

Empowering decision-making with adv. analytics & business intelligence

## Construction Technology

Integrated digital solutions that streamline construction through BIM.

# Our Core Capabilities

## Information Security Services

- Risk assessments
- Vulnerability management
- Security frameworks (ISO / NIST aligned)
- Data protection & compliance readiness

## Project Monitoring Solutions

- Real-time dashboards
- Performance analytics
- Risk tracking
- Operational visibility tools

## AI Automation

- Workflow automation
- Intelligent process optimization
- AI-driven analytics
- Integration with enterprise systems

## Geo Informatics

- Spatial data analysis
- GIS-enabled dashboards
- Data visualization
- Location intelligence solutions

## Application Development

- Web & enterprise platforms
- System integration
- Secure architecture
- Scalable deployment models

## Product Testing

- Quality assurance
- Functional & security testing
- Performance validation
- Compliance testing

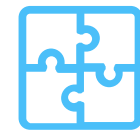

# Our Approach

## Security-First Architecture

Every solution is designed with security embedded from the foundation.

## Compliance Alignment

Solutions align with globally recognized standards and regulatory frameworks.

## Scalable Design

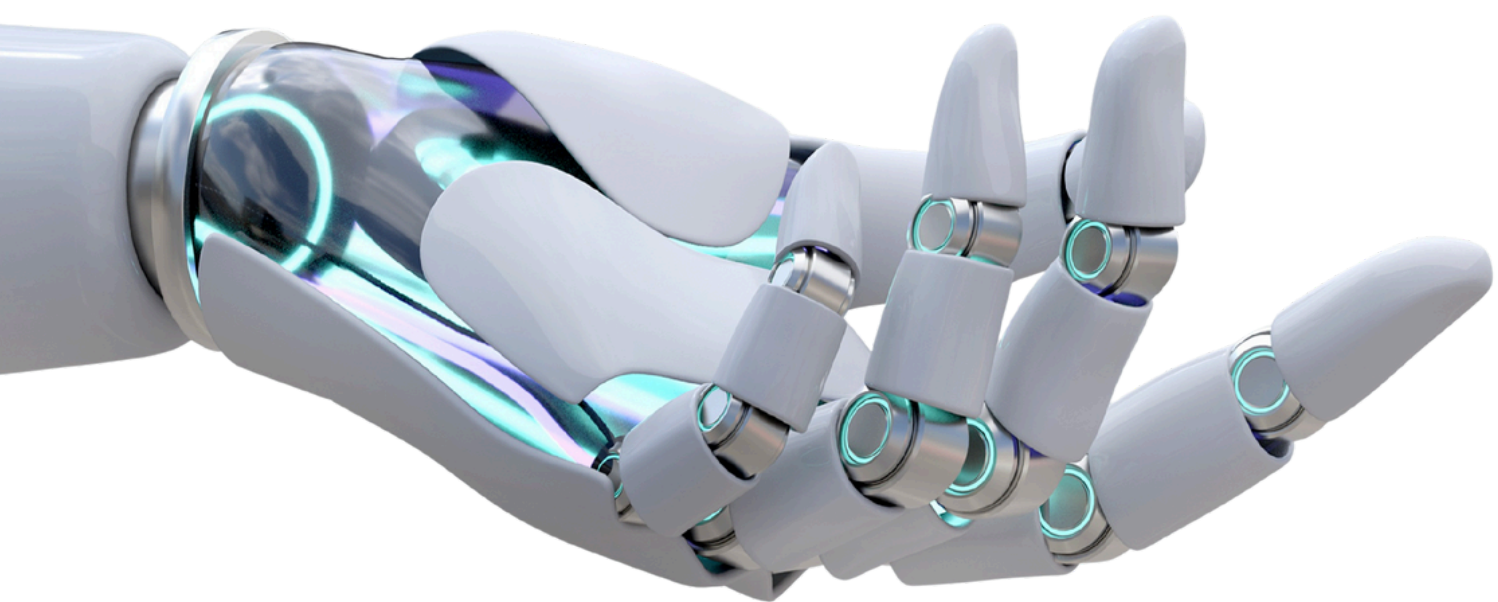

Infrastructure and applications built for growth and adaptability.

## Measurable Outcomes

Performance-driven delivery with clear operational impact.

# Architecting The Intelligent Enterprise

Our Core  
**Solution Pillars**

# Re-Architecting the Core :

## Modernization as the Engine of Digital Agility

Our application modernization and digital transformation solutions are designed to unshackle enterprises from legacy constraints, transforming rigid systems into modular, intelligent ecosystems that evolve with business needs.

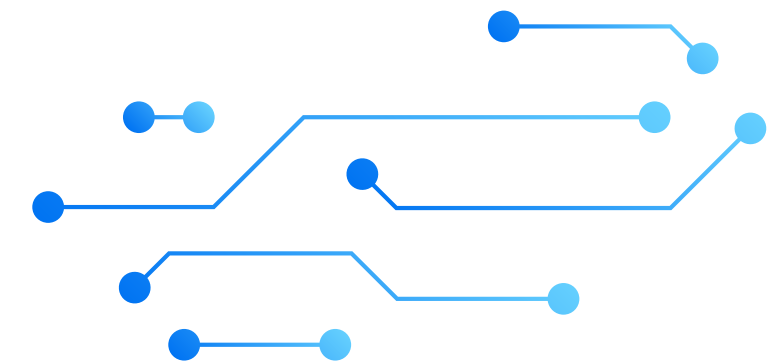

### Our transformation focuses on

Platform Re-engineering

Digital Process Reinvention

Tech-Value Transition

Experience-Centric Transformation

# The Cloud Continuum

## Building Intelligent, Autonomous Enterprises

Cloud today is more than infrastructure — it's the strategic nervous system of the digital enterprise. We bring a holistic cloud modernization framework that spans every dimension of transformation.

### Our Expertise Encompasses

Modern Cloud Architecture

Cloud Strategy & Migration Excellence

Cloud Lifecycle Management

Cloud-to-Edge Orchestration

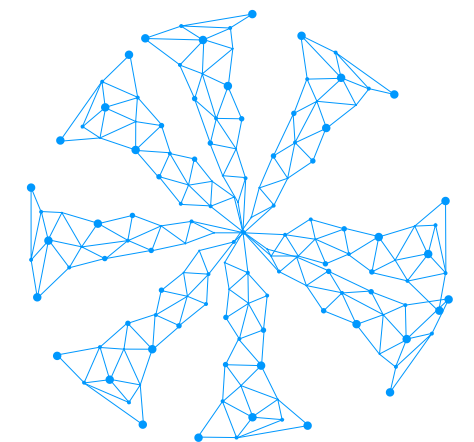

AIOps & Cost Optimization

Cloud Monitoring & Performance Manag.

### Cloud & Infrastructure

- Cloud Migration
- Backup as a Service
- Disaster Recovery
- Business Continuity
- Cloud Security
- Web Hosting

# GENAI

## Redefining Enterprise Autonomy with Gen AI

Our focus with Generative and Agentic AI is not experimentation — it's execution at scale. We design and deploy autonomous, goal-driven systems that think, reason, and adapt — enabling enterprises to move from reactive operations to self-optimizing ecosystems.

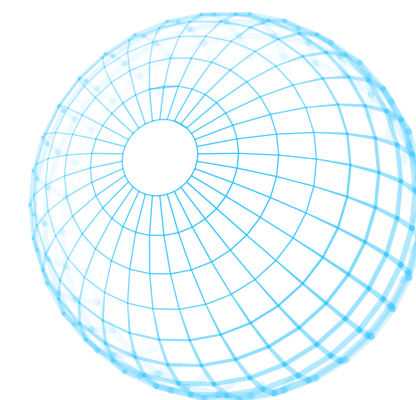

**At a strategic level,  
our AI-Driven architectures drive**

Cognitive Agent Networks

Generative Intelligence Layers

Adaptive Decision Engines

Industry Tailored Augmented Workflows

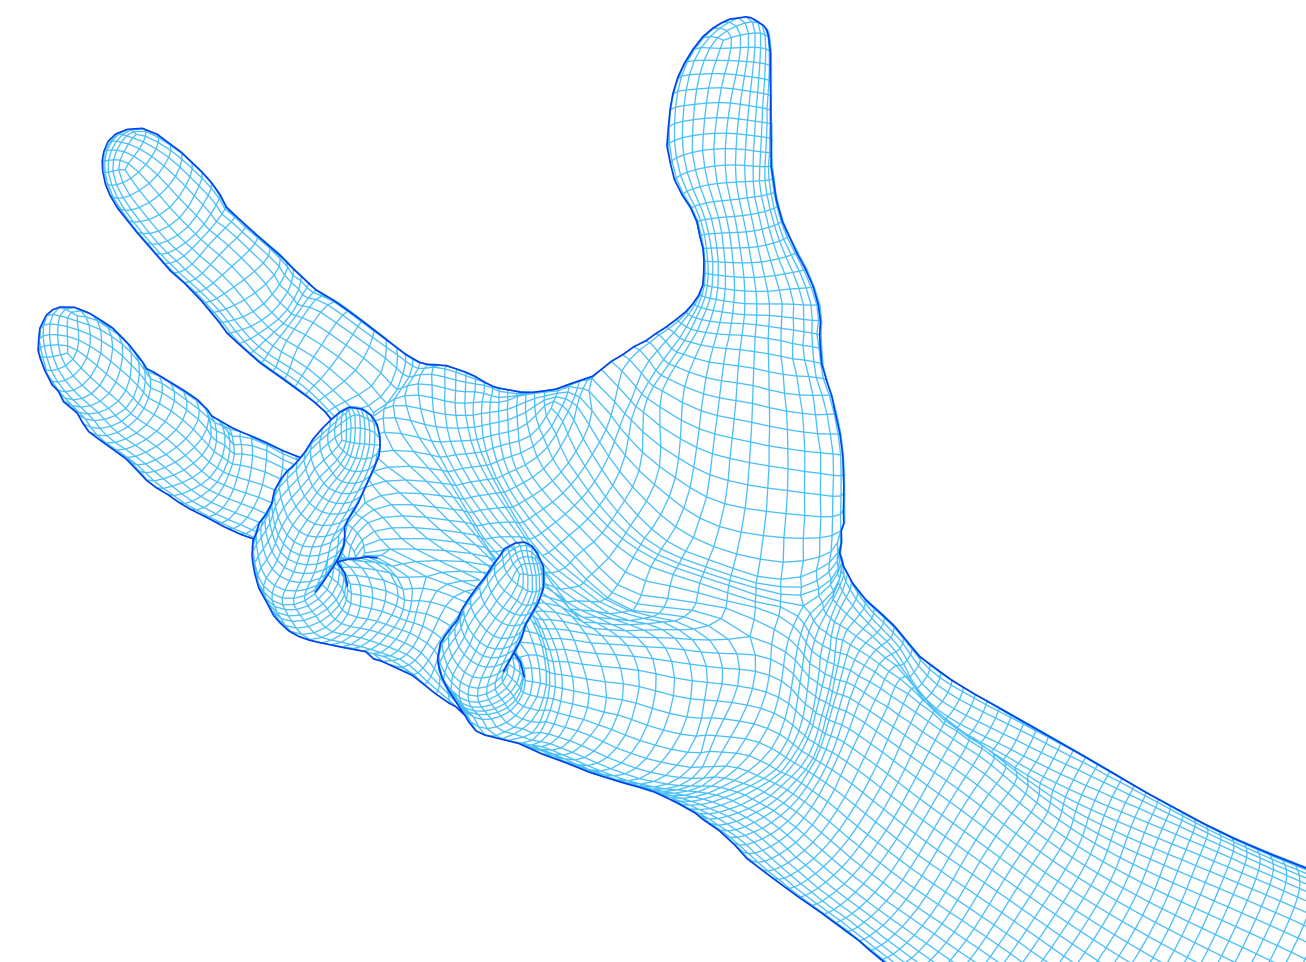

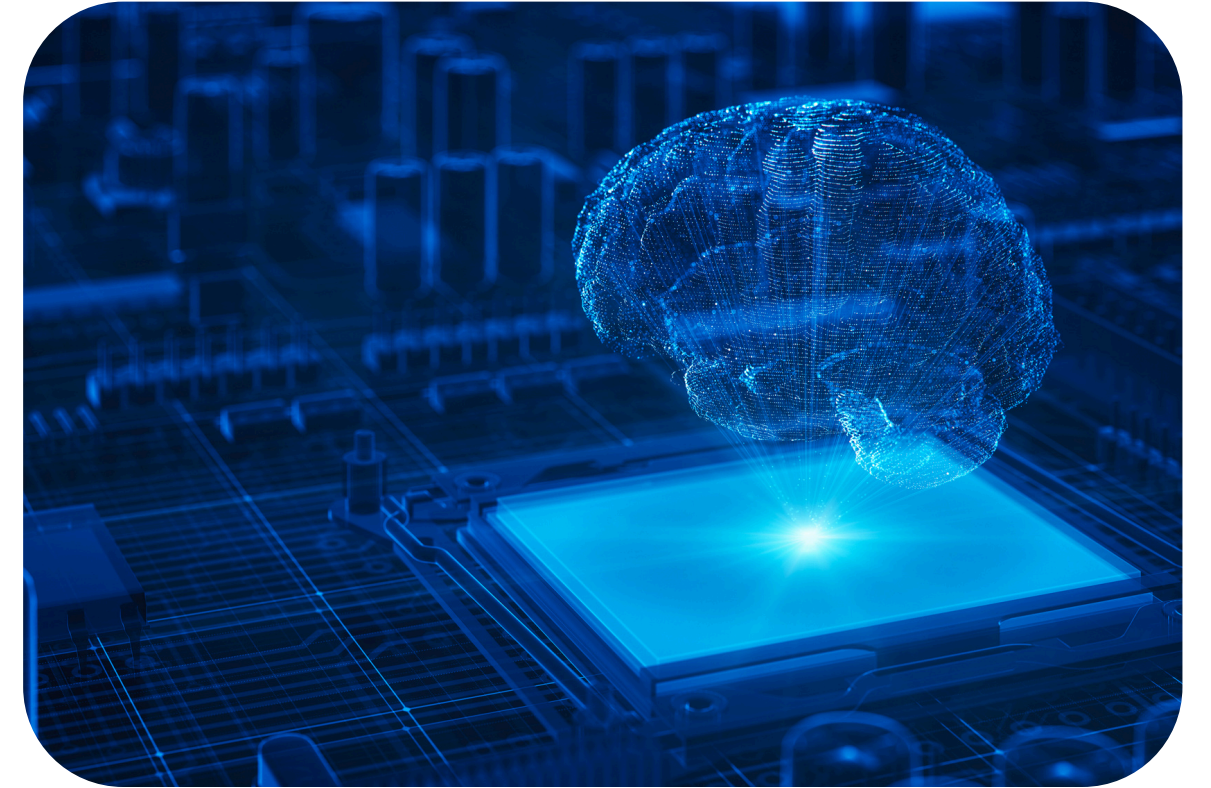

# Chainex

## Unlock the Future of Supply Chain

Chainex, the NexGen supply chain platform, revolutionizes operations with AI-driven automation, real-time analytics, and seamless vendor collaboration. Our cutting-edge technology empowers businesses with predictive insights, automated workflows, and intelligent procurement—cutting costs, reducing risks, and driving growth. Stay ahead of the competition with smarter decisions, faster execution, and complete supply chain visibility.

- Tailored to fit any industry or business
- Effortless Access with Single-sign on
- Real-time Visibility & Control
- AI-Driven Intelligence
- Quick Integrations & Automation
- Intuitive Dashboards
- Scalable Architecture
- Secure & Compliant

# Data as Capital

Turning the Information Core into an Intelligent Growth Engine

We help organizations evolve from data-rich to insight-driven, building a connected, trusted, and intelligent data ecosystem that underpins every business outcome

## Our Solution Spectrum Covers:

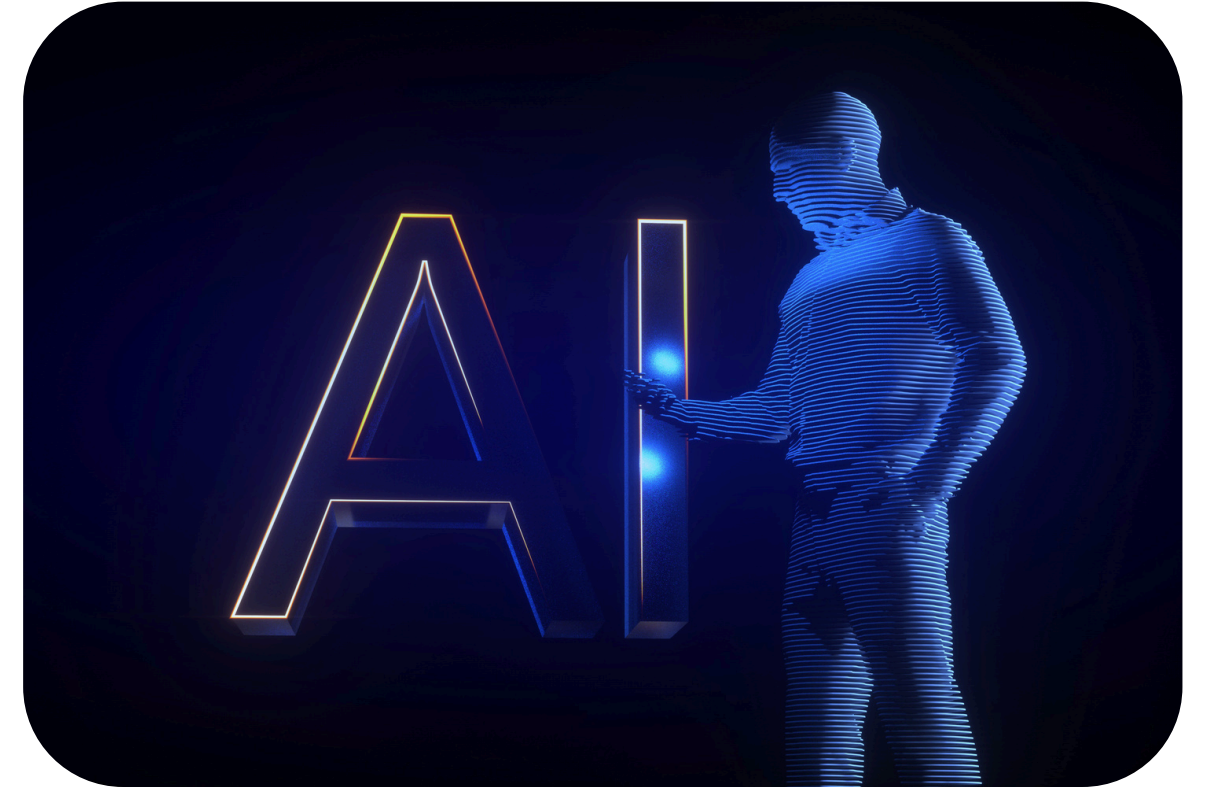

Data Strategy & Architecture Modernization

Data Integration & Interoperability

Adv Analytics & ML Enablement

Real Time Data & Streaming Insights

Data Platform Engineering

# Agri - Tech

## Transforming Agriculture Through Technology

Our Agro-Tech Solutioning framework redefines how agri-enterprises, cooperatives, and ecosystem players harness technology — transforming traditional value chains into intelligent, adaptive, and resilient ecosystem

Smart Farm  
Intelligence

Traceability & Supply  
Chain Transparency

Agri-FinTech  
Enablement

Agri-Data  
Platforms

Sustainability &  
Carbon Intelligence

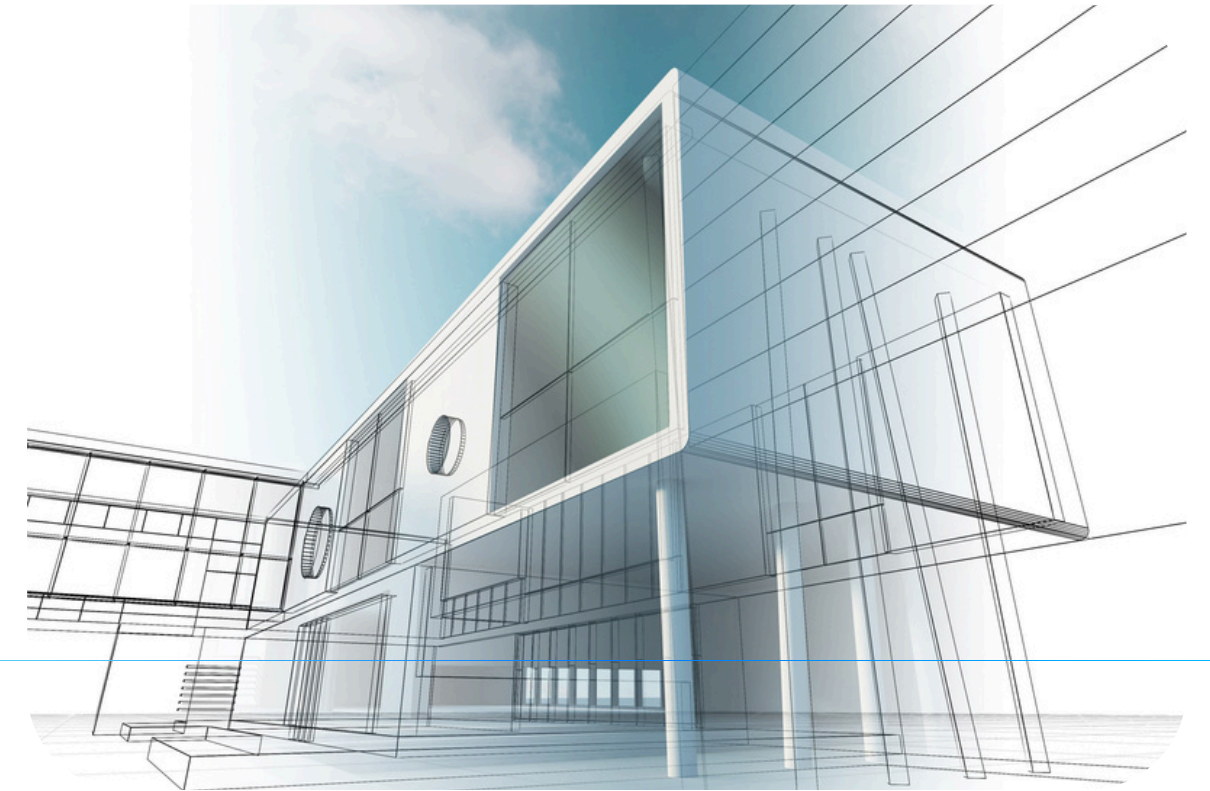

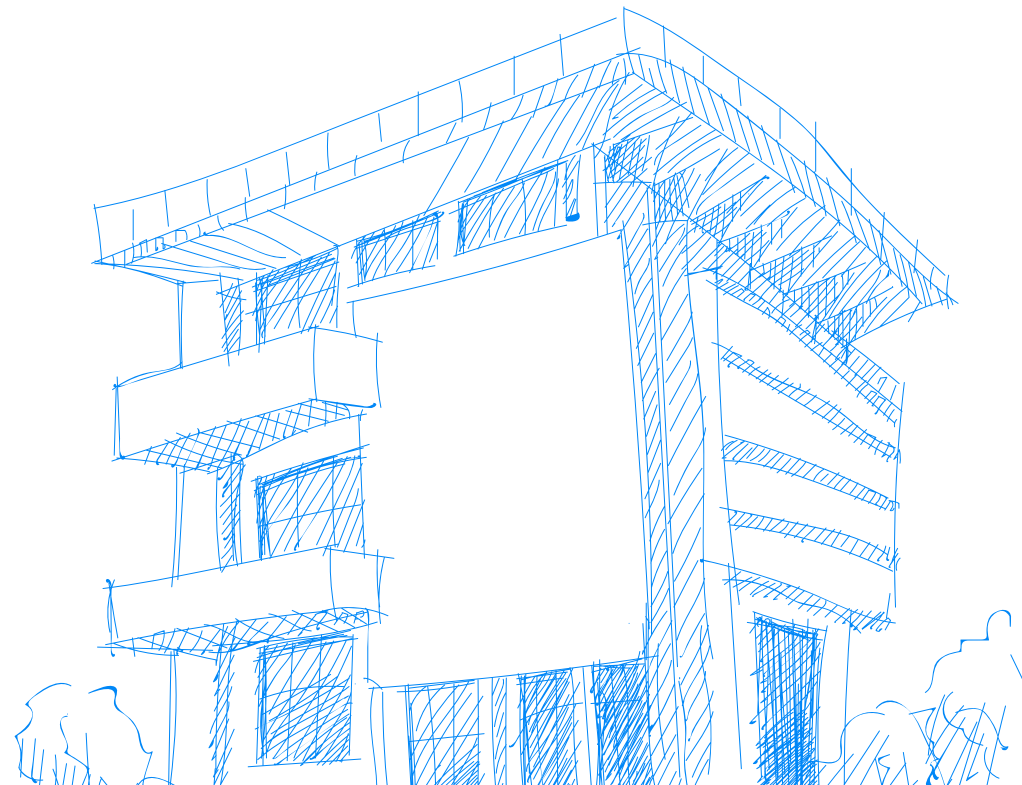

# Construct Tech

## Unlock the Future of Construction Intelligence

From real-time site monitoring and digital twin modeling to workforce optimization and predictive analytics, we empower construction leaders to reduce delays, control costs, enhance safety, and deliver projects with precision. Build smarter, execute faster, and gain complete visibility across every stage of your infrastructure lifecycle.

- Built for modern construction & infrastructure projects
- BIM deployment and coordination
- IoT-enabled smart site monitoring
- Construction analytics & reporting
- Project management platforms
- Workforce & technician management
- Digital twin solutions
- Secure and scalable architecture

## Construction Tech Services

- BIM Implementation & Coordination
- IoT-Based Site Monitoring Solutions
- Construction Data Analytics & Reporting
- Construction Project Management Software
- Technician Smart Workforce Management Tools
- Digital Twin & Smart Infrastructure Solutions

# Smart Helmet

## GPS Tracking System

For Worker Safety & Real-Time Monitoring

The Smart Helmet – GPS Tracking System is designed to enhance worker safety, ensure compliance, and provide real-time visibility of workforce activities in hazardous and large-scale work environments such as construction sites, high-rise buildings, and restricted zones.

The system integrates helmet-wearing detection, GPS tracking, altitude monitoring, geofencing, SOS emergency alerts, and two-way communication, all managed through a centralized alert dashboard.

# The Standard for Apple in the Enterprise

 **jamf** | CONNECT

Streamlined Mac authentication and identity management.

 **jamf** | NOW

Streamlined device management.  
No IT required.

 **jamf** | PRO

The Apple management standard.  
Built for IT pros.

 **jamf** | SCHOOL

Empowering educators with  
efficient Apple management.

 **jamf** | PROJECT

Enterprise endpoint protection purpose-  
built for Mac.

 **jamf** | NATION

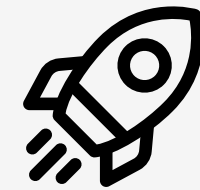

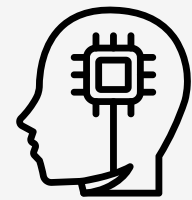

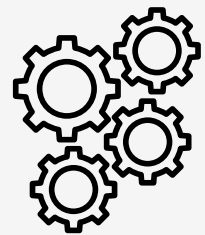

100,000+ fellow Apple  
administrators.

# Why We're - **Different** ?

Agile & Scalable  
delivery Models

Robust Quality &  
Security controls

Deep Domain  
Expertise

Focus on  
niche tech

Rapid  
Response Time

# Ecosystem Partners

# ERP Systems

# Let's Build the **Future Together**
